

Plannja AB:s Environmental Policy

Our vision

Plannja is the construction market's first choice for roofing products and services.

For our overall responsibility

Plannja committed to protecting human health and the environment and minimize environmental impact from our production facilities

For our owners

We will focus our resources to achieve shareholder profitability without neglecting our commitment to sustainable development.

For our customers

We will further develop our products and services in cooperation with our customers in a way where we actively contribute to environmentally sound and profitable business.

For our exploitation of resources

We will operate our facilities to maximize the efficient use of raw material and energy while minimizing the generation of waste.

For our society

We will operate under existing laws and requirements and take measures necessary to ensure that our internal rules and regulations are followed and as well prevent pollution.

For our employees

We will show respect for our employees by providing a safe, healthy and stimulating work environment and fostering their well-being.

For our way of communicating

We have honest and open communication with employees, customers and suppliers, governmental authorities and the public to build confidence and improve their understanding of our business.

For our ability to comply with this policy

We are committed to continuous improvement and monitor compliance to this policy in order to correct any identified deficiencies.

All employees have a responsibility to comply with this policy.
