

## Ruukki Construction

# Environmental & Sustainability Policy

At Ruukki Construction, we take decisive action for the environment and, together with our customers, suppliers, and other partners, strive for carbon-neutral, sustainable construction.

### Our Approach:

- **Sustainable Operations** – We protect the climate and nature by reducing emissions in our operations and value chain, using circular raw materials, and minimizing waste.
- **Sustainable Offering** – We design our products and services considering climate change, circularity, material efficiency, biodiversity, and safety & well-being. Our products have long lifetimes and are backed by transparent data.
- **Responsible Partner** – We act as a responsible partner to our customers, suppliers, and communities, and continuously assess sustainability risks in the value chain. We comply with all applicable standards and regulations.

At Ruukki Construction, our commitment to the environment, society, and responsible business practices is long-term — evolving through purposeful action, collaboration, and continuous improvement.
